

ACCOUNTABILITY • QUICK RESPONSE • CUSTOMIZATION • ON-SITE ASSESSMENTS

» It's the Law:

- You are required to make sure your PPE is properly maintained and inspected by a competent person at least annually

» Cost Savings:

- Cleaning your PPE prolongs the life of the product, thus saving you money

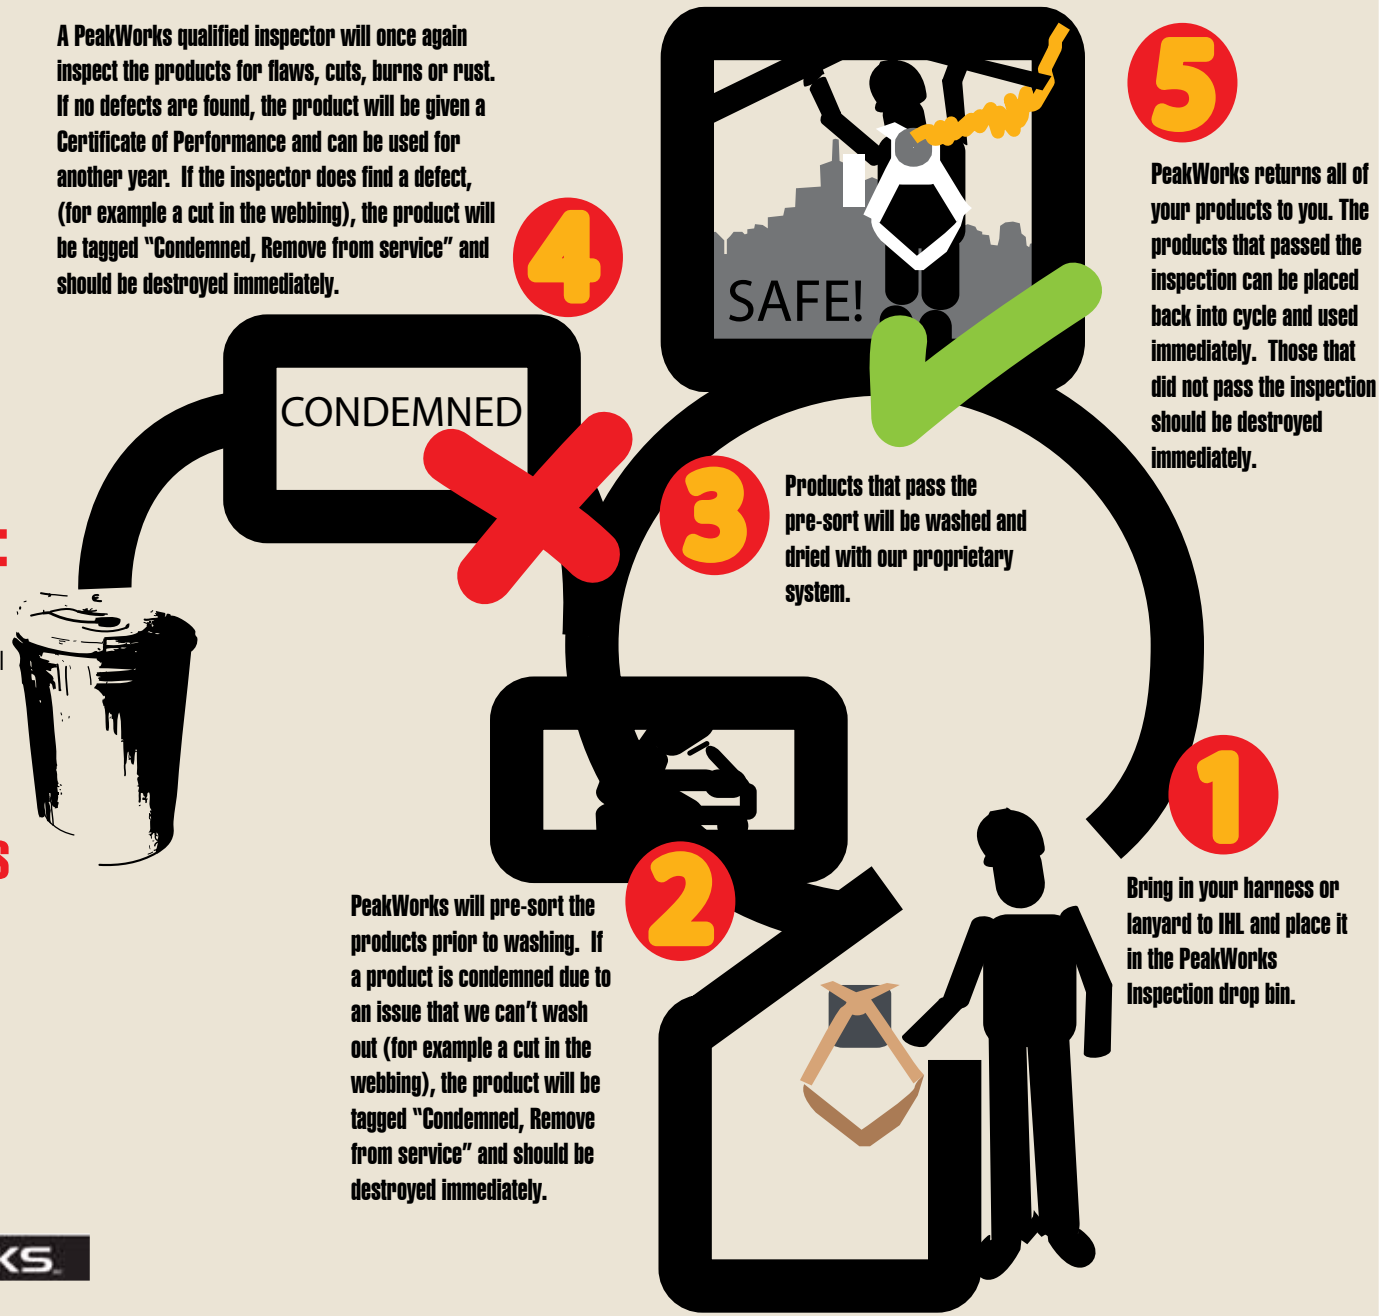

» For Your Health & Safety:

- We physically remove virtually all contaminants protecting your workers, your family, your home, your materials and articles from communal infections and harmful diseases; 99.9997% of dangerous bacteria will be terminated

» Restoration of your items to "Like New" Condition:

- Our process eliminates all foul odors as well deep, ground in dirt and stains such as oil, grease, soot, sweat, blood, and hazardous substances; your articles will be born again

A PeakWorks qualified inspector will once again inspect the products for flaws, cuts, burns or rust. If no defects are found, the product will be given a Certificate of Performance and can be used for another year. If the inspector does find a defect, (for example a cut in the webbing), the product will be tagged "Condemned, Remove from service" and should be destroyed immediately.
